*True copy*  
Signature:   
Designation: **ASSISTANT ENGINEER**  
**L.S.G.D. (Public Works) Section**  
**Niranam, P. Jilkaozhin Block**

Temporary building are those which are intended to serve the purpose temporarily for a short period and build with easily perishable materials and without proper masonry foundation and superstructure usually such structures are buildings of bamboo, jungle wood-posts cadjans or grass thatching provided (Katcha Sheds).

Semi permanent buildings: These structures are those provided with masonry foundations and superstructure but provided with jungle wood or cheaper variety for wood work for roof work generally roofed with coconut leaves. The type of construction is such that the structure can be made permanent with suitable alterations such as providing permanent roofs doors and windows etc.

In certain cases, material employed for roof work can be dismantled and routed in other locality such as building provided with masonry foundations and dwarf or walls and partitions for room but roofed over with tebbala or portal frame trusses with A.C. or C.C.E. sheet which could be dismantled and routed

Permanent Structures are those built with approved quality materials and according to specifications as permanent structures.
